Dear Eamon,

We were unable to source the 1.5kw geared motor Peg Mill due to the fact that they had discontinued production due to the covid pandemic.

The initial quotation was submitted in April 2019, however when the order came through, we sourced an alternative model of peg mill called ASTA 0.75kw which was within budget and would perform the same function.

We had no alternative at the time as there were limited suppliers of Peg Mills in Europe and you needed the machine as soon as possible.

I hope you understand our position.

Yours sincerely

Lara Costello
